TECHNICAL SKILLS

- **Languages:** Python (Advanced), JavaScript/TypeScript (React, Node.js), SQL, Bash, Java, C, PowerShell, Pester
- **Web & Frameworks:** Django, Express.js, HTML5/CSS3, Bootstrap, RESTful APIs, JWT Auth
- **Databases & Infrastructure:** PostgreSQL, MySQL, SQLite, Docker, Linux/Unix Administration
- **Tools:** Git/GitHub (CI/CD), Jira (Agile/Scrum), Web Servers, Unit Testing/TDD

SOFTWARE ENGINEERING PROJECTS

- **Task Management API & Dashboard:** Architected a robust REST API using Django REST Framework and a React frontend. Engineered complex relational PostgreSQL schemas to manage multi-user state, secure JWT authentication, and data persistence.
- **E-Market Full-Stack Platform:** Developed a complete e-commerce engine using Node.js, Express, and MySQL. Implemented secure authentication with bcrypt, a dynamic Admin Dashboard for inventory CRUD operations, and relational order-tracking logic.
- **Smart Calorie Tracker:** Full-stack health application built with Django. Integrated external USDA/OpenFoodFacts APIs for real-time food logging and utilized Chart.js for asynchronous macro-nutrient data visualization.

PROFESSIONAL EXPERIENCE

- **Kyocera Document Solutions Development America** Gardena, CA
Software Engineer in Test Apr 2025 – Present
 - **Backend Automation:** Promoted for engineering high-throughput automation scripts that increased task efficiency by 300%; reduced production backlog from 200 to 30 active tickets in the Bluefin/Hermes ecosystems.
 - **Tooling Development:** Developed and deployed custom web-server simulators to mimic hardware responses, accelerating system integration cycles by 10x.
 - **Agile Development:** Collaborated in an Agile/Scrum environment with developers and PMs to resolve critical logic bugs and optimize software release workflows.
- **Kyocera Document Solutions Development America** Gardena, CA
Associate Test Software Engineer Nov 2019 – Apr 2025
 - **Full-Stack Tooling:** Engineered automated test suites using Python and JavaScript to identify and resolve logic regressions in firmware-integrated applications.
 - **Failure Analysis:** Applied root-cause analysis to complex distributed system failures, developing and verifying code-level fixes to ensure long-term stability.
 - **Relational Data Tracking:** Designed and implemented standardized data-logging procedures to track performance metrics across production-grade hardware systems.

EDUCATION

- **California State University, Dominguez Hills** Carson, CA
Bachelor of Science in Computer Science Aug 2022 – Dec 2025
- **Los Angeles Harbor College** Los Angeles, CA
Associate of Arts in Math and Natural Sciences Aug 2019 – Jun 2021

CERTIFICATIONS

- **Google IT Support Professional Certificate:** Coursera / Google
